H) 158 Davenport Dr. – ABO presented condition on property, including pictures, of debris, tree limbs, cut up tree trunks, approximately 8 propane tanks of varying sizes and indeterminate ages, back porch damage, and water marks on house indicating water damage. There are several vehicles on the property including a boat, and not all are registered. The property is on the water and suffered damage in Hurricane Sandy. Mr. Acello indicated that he heats his home with a wood burning fireplace and collects wood for this purpose. Some propane tanks are his and others washed up after storm and he feels they have value. He reported that he has started to address some of the issues and recently sold his home in Florida which will allow him to pay for work to correct issues with property. He informed the committee that he has to pay past due taxes to get a permit and expects to do this in the next few weeks. MR MILLS arrived during this presentation and discussion and advised Mr. Acello that propane tanks have an expiration date and he should check these. Mr. Melzer made a motion to table this
