**Project Description** - Design and install electric vehicle charging stations on City properties to support Stamford’s municipal fleet electrification initiative. Proposed locations include the Highway Division (90 Magee Ave), Facilities Building (185 Magee Ave), Parks Maintenance Building (426–428 Shippan Ave), and continued installations at the Vehicle Maintenance Facility (100 Magee Ave). The project advances the goals of the Stamford 2035 Plan, the Mayor’s Climate Executive Order, and the City’s Climate Action Plan by modernizing municipal infrastructure, reducing emissions, and driving the decarbonization of City operations through the transition to a zero-emission fleet.

**Comments** - The existing \$125,000 in this account will be used before the end of FY25/26 to complete the first phase of City-fleet charger installations at the Vehicle Maintenance Facility. The additional \$300,000 requested will fund design and installation of the next phase at other City-owned sites serving Office of Operations departments. This aligns with the next round of the State of Connecticut VW Grant Program, under which the State would fund approximately 60% of project costs. The City’s share represents a modest investment that leverages substantial external funding to advance essential infrastructure consistent with the Stamford 2035 Plan’s vision for sustainable and efficient municipal operations.
