March 5, 2026

Dear Residents of the City of Stamford, Members of the Board of Finance, and Members of the Board of Representatives,

In accordance with Section C8-30-2 of the City Charter, please accept this submission of my recommended Capital Budget for Fiscal Year 2026 – 2027 along with recommendations for funding over the next six years. This budget authorizes \$73,182,500 in proposed project authorizations this year. Approximately \$36.6M of this year’s budget will be funded by General Obligation Bonds and roughly \$36.6M will be funded from other revenue sources. In December 2025, the Director of Administration recommended to the Board of Finance a safe debt limit of \$35M for this upcoming fiscal year. It is our intention to issue \$75 million in bonds, which will be applied toward both newly authorized and previously approved capital projects, primarily supporting improvements to the City’s infrastructure, including schools, parks, roads, and sidewalks.

In support of my vision to build a more equitable, inclusive, affordable, and vibrant city where everyone can thrive, this budget prioritizes investments in seven key infrastructure priorities that will enhance quality of life for Stamford residents: schools, parks, roads, sidewalks, housing, public safety, and sustainability.

Schools

As part of our continued focus on investing in Stamford Public Schools, this year’s budget proposes investments in school facilities that support our longer-term school construction plan and ensures safe and quality facilities for students and teachers. Capital investments in schools across the district include HVAC improvements at AITE High School, air quality enhancements at Newfield Elementary School, track reconfiguration and turf replacement at Stamford High’s Boyle Stadium, a fire pump replacement at Julia Stark Elementary School, roofing and energy efficiency improvements at Northeast Elementary, and safety and security upgrades across all 21 schools.

The construction of the new Westhill High School, Roxbury Elementary School, and Upper and Lower Schools are on track, with construction starting in the spring on the Westhill project.

Parks & Sustainability

Stamford's parks system is a cornerstone of our community, providing accessible green space, recreational opportunities, and enhancing quality of life for all residents. Consistent with my administration's commitment to advancing the goals of our Parks Strategic Plan, this budget makes investments at Cove Island Park to renovate the tennis and basketball courts (\$600,000), upgrade the Hatchfield Park playground and basketball court (\$2,525,000), implement citywide park lighting improvements (\$50,000), and move forward with the next phase of all-season restroom enhancements across city park facilities. Additionally, there are strategic sustainability investments that reduce our city's carbon footprint and enhance the long-term resilience of our infrastructure, including funding for the pump stormwater station (\$250,000), city-wide tree replanting (\$50,000), installation and replacement of storm drains (\$200,000), and design for the repair of the city seawall (\$350,000).

Roads, Sidewalks, and Pedestrian Safety

We surpassed our goal of paving 200 roads by 2025 and remain committed to sustaining this level of investment to ensure our streets are safe and well-maintained for years to come. Building on this momentum, this budget proposes a \$10.8 million investment in road and sidewalk paving and, for the first time, expands the program to include unaccepted roads. Additional funding is included for roadway design and construction (\$2M), retiming of traffic signals (\$325,000), bicycle and pedestrian safety improvements (\$125,000), Vision Zero Action Plan implementation (\$300,000), and Cove and East Side roadway improvements (\$250,000).

Housing

Affordable housing remains one of the most urgent needs in our community, and this budget proposes a \$3 million investment to advance critical affordable housing initiatives. This includes \$2 million to support the rehabilitation of 215 units at Stamford Manor serving seniors and non-elderly residents with disabilities, and \$1 million to help redevelop 240 existing units into 305 affordable units at the St. John's Towers site.

Public Safety

Ongoing investments in public safety are essential for ensuring the safety and well-being of Stamford residents. This budget supports our first responders with the most up-to-date technology, vehicles, and critical infrastructure they need to serve our community effectively, including: fire apparatus (\$800,000), police vehicles (\$375,000), blue light and security cameras (\$125,000), and fire hydrant replacements (\$100,000).

Quality of Life

Finally, this budget proposes targeted investments in critical community assets, including funding for the design of the East Side Library Branch (\$3,350,000) and support for the demolition of the old Animal Shelter (\$900,000), advancing long-term capital investments to public facilities that serve residents across our city.

FISCAL YEAR 2026 / 2027 CAPITAL BUDGET			
	Bond Authorization	Other	Total
BOE	8,432,500	5,425,500	13,858,000
City	24,531,521	18,967,979	43,499,500
WPCA	-	7,950,000	7,950,000
Special Revenue	-	1,200,000	1,200,000
Non-City Agencies	3,625,000	3,050,000	6,675,000
Totals	36,589,021	36,593,479	73,182,500

Fund Source	
Bond (City)	36,589,021
Bond (WPCA)	5,300,000
WPCA Reserve Fund	3,850,000
Capital Non-Recurring	10,249,000
State Grant	14,794,479
Private Contribution	2,400,000
Totals	73,182,500

I want to extend my appreciation to members of the public and community organizations for their advocacy, Planning Board members for their diligence and hard work developing their recommended Capital Budget, and the Board of Finance and Board of Representatives for their efforts and diligence in the approval of this budget to meet the capital needs of our city.

Respectfully submitted,

Caroline Simmons

		2,000,000	2,000,000	2,000,000	0	0	0	0	0	0	0	0	2,000,000

Comments - Existing conditions of the fresh air system serving the classrooms and the air handling units serving the auditorium and gymnasium were found to be past useful life expectancy and considered for replacement. The first phase of the project shown in the Project Balance has received a grant commitment through the competitive State of Connecticut HVAC Indoor Air Quality Reimbursement Program. The second phase of this project will updated the building automation continuing the efforts of the district to to centralize building systems monitoring and will similarly seek a State grant.

		5,000,000	3,150,000	250,000	0	0	0	0	0	0	0	0	5,000,000

Comments - The District performed a feasibility report in 2022 for the SHS Auditorium opened in 1927 including catagorized probable costs. The auditorium is a proscenium theater with raised stage and fly tower. There is a sloped seating area with balcony above the rear third of the seating section. Flooring abatement continues previous work supported by State grant authorization.

Comments - Comments: After receiving initial project estimates provided by Trophy Point in August of 2024, the pavilion project, combined with the greenhouse project, was redesigned to attempt to reduce overall costs. Trophy Point provided new estimates on the updated project design on October 27, 2025. While some savings were realized in the redesign, several project costs have escalated over the 14-month period it took to develop and review the new design.

Comments - Maintenance is preformed year round, but the building lacks heat and water. Electric power, water and septic would tie into the new Horticultural Center's utilities. This project addresses Stamford 2035 Comprehensive Plan STRATEGY 12: Improve and connect Stamford's parks, open spaces, plazas, and waterfront. The upgrade to the Arboretum's maintenance building is an investment that facilitates the care and maintenance of one of the City's premier public spaces. The Arboretum's 93 acres of natural open space are open daily from dawn to dusk, free of charge for all to enjoy. It's maintenance building/workshop is essential to its continued success in serving the community.

		2,750,000	1,375,000	1,000,000	0	0	0	0	0	0	0	0	2,750,000

Comments - Main Branch Phase 1 is underway, and Phase 2 bids came in over budget/balance. The requested funds for FY2027 will continue this project through completion. An ARP grant of \$2 million partially funded this project. It expires 12/31/26. The HB branch's HVAC equipment is original to the building when it was built in 2000. It is at end-of-life and subject to frequent and costly repairs (\$46,000 in FT2025). Additionally, energy consumption is inefficient (over \$15,000 in FY2025). A budget for the new HVAC system has been established by HMA2 Architects and Legacy Engineers Both libraries serve as cooling centers for City residents. These projects strengthen anchor institutions and have a healthy goal to create and maintain a healthy environment, as defined in the prosperous section of CP 2035; they complies with strategy #14 - improve energy efficiency in buildings.

Project Description - In anticipation of modernizing the Main Library elevators, the library requested an independent evaluation from VDA Elevator & Escalator Consulting of our current elevator's conditions. In 2000, a complete modernization was performed and now the existing Montgomery/Kone controls are past their useful life. The existing door equipment is at or met its life span and is also in need of replacement. The current HVAC system from the early 1980s was at end of life in the early 2000s. The chiller replacement was installed in 2008, however the pneumatic system remained in place.

Comments - TThe requested funds will address three principal needs: 1.) Elevator system upgrade and modernization. An independent consultant had advised us that the elevator operation, last upgraded in 2000, is beyond its useful life. The existing controls and door operators are in frequent need of repair. The estimated cost of this is \$300,000 to \$500,000. 2.) Repair 1913 windows. The original windows in the 1913 building are in desperate need of repair. The wooden mullion have deteriorated, leaking, and are not energy efficient. The restoration firm that worked on the historic façade in 2016 has estimated the cost to restore to SHPO standards would be \$160,000. 3.) Remaining funds, if any, would be used to undertake needed redesign of certain "book warehouse" stacks areas into much requested meeting rooms, quiet reading/study spaces, etc.

Comments - The Avon Theatre Film Center, founded in 1939, is a cornerstone of Stamford’s cultural and historic landscape and the only remaining theater in Fairfield County dedicated to independent films and documentaries. Beyond film screenings, the Avon hosts community film festivals, educational events, and local collaborations that enrich Stamford’s artistic identity while also being an important economic driver for the restaurants in Bedford street. However, the building has reached a critical point in its life cycle. Deferred maintenance, outdated infrastructure, and accessibility limitations threaten the long-term sustainability of this community asset. The Avon Theatre Board has launched an \$14 million capital campaign to restore and modernize the facility. The Avon has already raised 11M including two CT state grants in a total amount of 2.4M. The requested

Comments - Restore and Paint Deteriorating Plaster - The Palace was built in 1927. While it may not be feasible to restore its original grandeur at this time, there are several areas where the plaster is very suspect to fall. Walls are being probed and scanned to determine where and how the moisture is accumulating in the plaster. Specific areas were estimated and bid with pre-qualified historic restoration specialists. Balance is for the emergency netting. Work is planned as follows: 1. Plaster throughout Goldstein Foyer ~\$325,000 2. Plaster at Rear Wall (replace wall); East Wall and West Wall Faux Travertine ~\$175,000 3. Proscenium Soundboard and back Soundboard with scaffolds ~\$175,000 4. Have to address the failing areas that are temporarily netted over for safety The Palace continues as a vibrant cultural hub that provides access to the arts for all (Strategy 31). In addition, preserving the landmark building should be central to a vibrant downtown (Strategy 4, 6). SCA provides a significant economic impact to the area in addition to improving the well-being and quality of life of residents (Strategy 17).

Project Description - The Stamford Harbor Lighthouse, built in 1882 on Chatham Rock, has guided ships safely into Stamford Harbor for over 140 years. Once essential to the bustling port's growth, it remains a historic landmark listed on the National Register of Historic Places. After decades of private ownership and neglect, the lighthouse is now in urgent need of repairs to prevent its loss.

		100,000	0	50,000	0	0	0	0	0	0	0	0	100,000

Comments - The funding for the project will come from a variety of sources including private donations and grants in addition to the requested funds from the City of Stamford. To date the Stamford Harbor Lighthouse Project has collected over \$750,000 toward the project. In addition, we were recently awarded a Survey and Planning Grant of \$20,000 from the State Historic Preservation Office and we have a Community Funding Project Grant of \$500,000 under consideration by the federal government. The support of the City of Stamford will be of great benefit in soliciting donations from the community and is critical to the success of the project. The requested funding of \$100,000 will be used towards the restoration of the exterior which we are planning for next summer. We have completed structural repairs to the caisson and are preparing for painting, replacement of windows and doors, and repair of the metalwork. The money from the Community Funding Project will be used to repair the breakwater and docks in order to make the lighthouse accessible to the general public. Other planned projects include restoring the oyster beds in the surrounding 10 acres of land which will both help protect the harbor from rising sea levels and aid in cleaning the harbor water. A restored Lighthouse will be a true "Gateway to Stamford" that will instill pride in the entire community and attract visitors by boat from throughout Long Island Sound.

Encumbered	132,970.00	Amount Available	35,600.00		
Advanced		Unfunded	1,992,500.00		

Project Description - The purpose of this project is to replace Bridge No. 135008 which is structurally deficient. The existing bridge was built in 1960 and consists of a 12.25 ft clear span steel beam with a concrete cast-in-place concrete deck on a 30-degree skew. The structure carries one lane of traffic in each direction with an overall curb-to-curb width of 18.9-feet. The bridge is supported on dry stacked stone abutments with a cast-in-place concrete bridge seat with stone wingwalls. There is bituminous concrete curbing on southeast approach and no sidewalks on either side. The replacement would involve road closure with traffic detour, removal of existing bridge, installation of new prestressed deck unit beams, constructing parapet wall and new guide rail. Currently the bridge is under limited weight restriction and one bi-directional lane of traffic due to a deteriorated beam on the structure. A large sink hole was recently repaired on the approach to allow traffic back on the bridge.

		2,649,000	2,649,000	2,649,000	0	0	0	0	0	0	0	0	2,649,000

Comments - Due to March inspection revealing spalling of the concrete and structural failure of reinforcement in the deck unit on the northern section, the northern lane was closed to traffic and now operates with one-lane alternating traffic with stop signs. After this closure, the City submitted a grant application and received conditional State Grant award of 50%. Engineering prepared an RFP for design services and awarded the design of the bridge to Cardinal Engineering. Design funding has been authorized.

Comments - A preliminary grant application was submitted to the State of Connecticut Department of Transportation's Local Bridge Program for fiscal year 2024 prior to the 5/31/23 deadline. The local bridge program funding limit for projects is currently \$10,000,000. On July 13, 2023, the City received an email from the States Transportation Supervising Engineer that stated: "The Department received 51 applications requesting over \$56,000,000 in grant funding. Applications were selected based on sufficiency and priority ratings and due to the limited amount of funding available, we were unable to commit your applications for funding. We encourage the Town to resubmit an application for funding for fiscal year 2025 using the new application form." Due to its deficiency, starting the design for the replacement of the bridge will be beneficial to receive the State Grant Conditional award of 50% for the project. Engineering will submit a grant application in May 2026 with a decision made by 7/1/2026. The outyear request is for construction and inspection services.

Advanced		Unfunded			

Project Description - The purpose of the project is to replace Bridge No. 135001 which is structurally in poor condition. The bridge was built in 1926. The replacement would involve closure of the road with detour for traffic, removing existing bridge, constructing new abutments and wingwalls, constructing new full height parapets, metal hand rail, approach walls, reconstructing approximately 75 feet of roadway on each side of bridge.

		750,000	750,000	750,000	0	0	0	0	0	0	0	0	750,000

Comments - The request includes special handling of impacted soils containing PCBs, installation of a fence along the southern border of the park (a longstanding request from the public and a waterside district representative, particularly following the incident in the park), the possible addition of a pickleball court, and increased costs associated with Phase 2 design elements included in the NPS ORLP grant scope. This is the final phase of the project. The escalation may possibly be reimbursable at 50%. The Notice of Award was issued in 2021, but the grant was not fully executed until August 29, 2025. The NPS has verbally expressed support for funding 50% of any cost increases.

Request		FY 26/27					Capital Forecasts						
Funding Source	Term	Dept	Planning	Mayor	BOF	Adopted	FY 27/28	FY 28/29	FY 29/30	FY 30/31	FY 31/32	FY 32/33	Total
Bond (City)	20	1,884,320	1,120,000	0	0	0	0	0	0	0	0	0	1,884,320
		1,884,320	1,120,000	0	0	0	0	0	0	0	0	0	1,884,320

Comments - These projects are not grant eligible but can qualify for Investment Tax Credits (ITC) under the Inflation Reduction Act, which covers up to 30% of eligible project costs. While this credit cannot be applied upfront like a grant, it is important to note that the City will not ultimately bear the full cost, provided the system is in place before 2028 to receive the credits. Total Estimated Cost (Before ITC): \$1,884,320 – City Bond Total Estimated Cost (After ITC): \$1,379,024 – City Bond Proposed Sites and Estimated Costs: Site 1: Vehicle Maintenance Facility – 200 kW AC, \$658,000 (30% ITC eligible), conservative simple payback = 9-10 years Site 2: Terry Conners Ice Rink – 260 kW AC, \$936,320 (30% ITC eligible, high-end estimate), conservative simple payback = 9-10 years Site 3: Recycling Drop-Off Center – 30 kW AC, \$90,000 (30% ITC eligible), conservative simple payback = 9-10 years Site 4: Cummings Park Beach – \$200,000 (potentially ITC eligible) - The Cummings Park Beach project includes two (2) ArcBeam off-grid PV systems at approximately \$100,000 each. These self-contained systems can be deployed anywhere to support Level 2 EV charging and are ideal for locations with limited electrical infrastructure but strong solar access. Two ArcBeam systems would support up to four charging spaces in the Cummings Park Beach parking area.

Project Description - Design and install electric vehicle charging stations on City properties to support Stamford’s municipal fleet electrification initiative. Proposed locations include the Highway Division (90 Magee Ave), Facilities Building (185 Magee Ave), Parks Maintenance Building (426–428 Shippan Ave), and continued installations at the Vehicle Maintenance Facility (100 Magee Ave). The project advances the goals of the Stamford 2035 Plan, the Mayor’s Climate Executive Order, and the City’s Climate Action Plan by modernizing municipal infrastructure, reducing emissions, and driving the decarbonization of City operations through the transition to a zero-emission fleet.

		300,000	255,000	255,000	0	0	0	0	0	0	0	0	300,000

Comments - The existing \$125,000 in this account will be used before the end of FY25/26 to complete the first phase of City-fleet charger installations at the Vehicle Maintenance Facility. The additional \$300,000 requested will fund design and installation of the next phase at other City-owned sites serving Office of Operations departments. This aligns with the next round of the State of Connecticut VW Grant Program, under which the State would fund approximately 60% of project costs. The City’s share represents a modest investment that leverages substantial external funding to advance essential infrastructure consistent with the Stamford 2035 Plan’s vision for sustainable and efficient municipal operations.

Project Description - Project Description: One-time request to hire an administrator to develop and manage a centralized system for the Below Market Rate (BMR) Program, which currently relies on over sixty private building owners to individually manage waitlists, tenant income certifications and applications. The Program has supported the development of over 1300 affordable units since 2001 and faces upcoming challenges, especially as it continues to expand and units begin to age. The Program has seen unprecedented growth and is one of the most successful of its kind nationally but requires serious investment to set up basic infrastructure in order to address ongoing issues with efficiency and oversight. Deliverables: 1. Consolidated Waitlist. 2. Online Management Platform. 3. Policy Manual. 4. Future Cost Estimates. Once implemented, the system will provide residents with a single application point reduced application fees, relieve property owners of complex administrative work, and vastly improve the City's oversight. After the initial start-up, ongoing costs will be supported primarily by requiring annual fees from participating buildings owners, making the system financially sustainable in the long term.

Project Description - Micro Forests are an efficient way to reduce the urban heat island and other detrimental effects of climate change in particular in vulnerable neighborhoods like the Westside or Cove. Micro forests are typically no larger than 5,000 sf and are suitable for the urban context. With these funds four locations would be explored for their suitability for a micro forest: Judy Lane, Selleck & Davenport, Atlantic & Henry, and Stephen Street. The funding will also pay for the removal of hardscape (at 3 of the locations), remediation of soils, the planting materials, and watering. It is also expected that this project will leverage DEEP urban forestry grants. It is intended that the program would make small city owned parcels more productive and reduce maintenance cost of these sites.

Project Description - The City has 22 baseball/softball diamonds, 10 soccer/football fields, 12 basketball courts, 24 tennis courts 16 playgrounds and one, small, deteriorating public pool in the northeast corner of the City. It would therefore be timely to include a feasibility and needs assessment for a centrally located public pool into the plan. Parks facilities are well-used and will have increased demand for usage as the population continues to grow and change. The study will complement the 2023 Parks Strategic Plan Action Item 1.1 to "Execute a Parks Facility Needs Assessment." It will include assessment of demographics of current and future players, analysis of sport trends, and best practices in field allocation policy according to player ages, seasons, non-profit versus for profit, and adult versus youth. Another important topic of the study will be whether park and school fields should be combined under one administrator for maintenance and programming with the goal of reducing the cost for managing and maintaining the City's athletic facilities. The increased request is due to the expanded scope, e.g., inclusion of pools and identification of new sites for athletic facilities, as well as general cost increase from previous years.

Bond (City)	20	850,000	850,000	500,000	0	0	0	0	0	0	0	0	850,000
		850,000	850,000	500,000	0	0	0	0	0	0	0	0	850,000

Comments - Planned upgrades at the Lathon Wider Community Center will necessitate adherence to updated code compliance standards, which will require a building wide sprinkler system. CLC operates within the building, and having a sprinkler system in the building is a critical health and safety concern for the City.

Project Description - Prepared detailed report by outside consultant Institute of Human Design of all City Facilities which indicates these regulations adopted revised, enforceable accessibility standards called the 2010 ADA Standards for Accessible Design "2010 Standards" or "Standards". The 2010 Standards set minimum requirements – both scoping and technical – for newly designed and constructed or altered State and local government facilities, public accommodations, and commercial facilities to be readily accessible to and usable by individuals with disabilities

Location: Citywide
Neighborhood: **Voting District:**

		Dept Priority	2	Tier	1
Oracle Date	2026-02-18	YTD Balance	2,423,801.70		
Encumbered	29,851.71	Amount Available	1,120,374.11		
Advanced		Unfunded	1,303,427.59		

Project Description - Funds provided by utility companies for the restoration of road opening construction projects historically cover partial restorations (curb to center line). The funds in this project will allow for full restoration following any construction on roads with partial utility company repair funding added to the account upon the projected cost estimate provided by Engineering. Road Maintenance will oversee the restoration and utilize the funds to ensure full restorations (curb to curb) of roads where necessary. Curb to curb restorations will result a greater chance of preserving the integrity of the road surface which is known to prolong the life of the road requiring less of a chance of road patch failures and need for resurface prior to 5 years.

Encumbered	2,240,740.51	Amount Available	276,904.91		
Advanced		Unfunded	200,000.00		

Project Description - Each year the Department seeks and is awarded millions of dollars in State transportation funds whether from LOTCIP, CIF, CCGP, Rec Trails, or other government and private funding sources. These City funds leverage the grant funds for design and matches. Additionally, funds are used to address safety and traffic operation deficiencies across the city. This year, funds will go towards design of the Bulls Head area (\$500,000) to support a \$4M LOTCIP Grant, City match (\$800,000) for the \$3.5M CMAQ Phase H Traffic Signal Upgrade Grant, design of the Long Ridge/Stillwater/Roxbury intersection (\$500,000) to support a LOTCIP grant in anticipation of the new West Hill High School Project. Remaining funds will go towards safety upgrades to Courtland Ave (\$200,000), and construction/design support (\$500,000).

Project Description - Projects and actions as recommended by the Vision Zero Action Plan. This Plan has various recommendations and plans for roadway safety projects to achieve the City's goal of Zero roadway deaths. This funding allows the Department to immediately take action and begin construction based on the plan's recommendations. Examples of roadway safety measures that may be implemented are: pedestrian bump outs, medians, protected bike lanes, raised crosswalks, and enhanced pedestrian lighting.

Project Description - For capital improvements to the City's 211 Traffic Signals. With the second largest city-owned traffic signal system in the State, the Bureau is responsible for keeping a good state of repair and constantly updating our signal system to improve safety and decrease congestion. These requests support State and Federal Grants that the department obtained. Each year the bureau identifies various funding opportunities to leverage investment in the City's transportation network. We continue to work with WestCOG and the City's lobbyist to identify other sources.

Project Description - The Stamford 2035 Comprehensive Plan has a Keystone project for the Bedford and Summer Street Vision. "This keystone project investigates the evolving Bedford and Summer Street area, north of Downtown, to enhance multi-modal connections, prioritizing pedestrian, bike and bus, to the city center and support its planned transition to a mid-density, walkable mixed-use urban zone." This funding will support a comprehensive roadway planning and design process to upgrade Bedford and Summer Streets to be more multi-modal in nature, ADA compliant, and support future development as called for in the 2035 plan.

Project Description - There are over 3 million bus rides on CTTransit every year in Stamford. 76% of parcels in Stamford are within a 10 minute walk to a bus stop. The 2035 Comprehensive Plan found a significant mis-match between service offered and service needed by CTTransit. The City of New Haven, Hartford, and Norwalk recently underwent redesigns of their bus network. This funding will go towards a wholistic redesign of the City's bus network with CTTransit and CTDOT to maximize frequency, service, and routes. Additionally, funds will go towards transit supportive infrastructure such as bus shelters, bus stop upgrades for ADA compliance, and other tools that enhance and facilitate transit usage and access.

Advanced		Unfunded	135,000.00		

Project Description - With the changes in traffic patterns resulting from the COVID-19 Pandemic, new residential construction, population growth, and general driving pattern changes, this project will retime the traffic signals with new timings and adaptive signal technology in the Downtown core and around interstate 95 to increase vehicle efficiency and vehicle and pedestrian safety. The last time the City collected data for this was 2017, and we need to stay current to changing traffic volumes.

Project Description - To construct sidewalk extensions, to connect missing portions and other priority areas of Stamford as a result of the Vision Zero Action Plan, 2035 Comprehensive Plan, Traffic Calming Plan, and the Bicycle and Pedestrian plan. Sidewalk extensions projects are often focused around school locations as students are not bused within a mile of school. Various safety improvements are incorporated to sidewalk projects such as crosswalks, bump outs, and street trees.

Comments - # 1- Command truck. The current Police Command Vehicle was purchased in 2006 and is in need of major repairs / upgrades. The Fire Department's command Vehicle is no longer operatable. Both PD and Fire had previously put in capital requests to upgrade our respective vehicles, however, with escalating costs, neither department had enough funding to accomplish this objective. In an effort to provide the best possible product for handling large scale events and emergencies and reduce costs, it was determined that the best approach would be to purchase a single new modern Public Safety command vehicle that could be used by PD and Fire. With the additional request of \$375,000 based on recent quotes a new Public Safety combined command vehicle could be purchased and utilized by all agencies under the Public Safety umbrella.

Comments - The Police firearms range is in need of some significant upgrades with the start of the upcoming new Police Academy housed at Police HQ. New Police recruits will be doing their initial firearms training here which requires a larger safety area / bullet proofing for initial training vs. veteran officer requalification's / training. Specifically, the steel plating and bullet absorbing rubber material currently only extend back five yards from the target area. This safety area should be extended back to at least the 15 yd. line. In addition, the electronic/mechanical control system that operates the targets, lights, sound, etc. is outdated and is no longer being supported by the manufacturer with replacement parts or servicing and should be replaced. Action Target (who usually does the lead abatement and initially installed the range) has conservatively quoted the PD at \$230,000 for these needed upgrades.

Project Description - The water company is replacing and improving several water mains throughout the city. As they replace the water mains we replace the old hydrants connected to the old mains. Funds will be used to maintain all hydrants and replace damaged and/or inoperable fire hydrants to assure water supply. Also add new hydrants for new water mains added to system. The construction portion of these ongoing obligations are: digging out existing plumbing and hydrants, road, and sidewalk repairs to restore to previous condition. We have met with the water company and created a priority replacement that is currently being done.

Advanced		Unfunded	767,797.00		

Project Description - The fire department is looking to replace an outdated water tanker. The current apparatus is a 1986 Mack/Maxim tanker with a 500 GPM pump. The proposed tanker will be much safer as it must comply with all applicable motor vehicle safety laws. It would feature a 1,500 GPM pump.

		800,000	800,000	800,000	0	0	0	0	0	0	0	0	800,000

Comments - The current tanker manufacturer is no longer in business. The current pump capacity does not adequately support present water requirements. The tanks' manually operated dump outlet necessitates positioning an individual in a rear blind spot, which presents significant safety concerns. Additionally, the vehicle is not equipped with airbags, anti-skid braking systems, or stability control features. The complexity of its 10-speed manual transmission poses challenges for driver training and consequently limits the pool of qualified operators. Furthermore, the electrical wiring, which has been in service for nearly four decades, represents a substantial maintenance and reliability risk that could potentially result in a station fire. This tanker serves a key role in fire protection for the Non-Hydrant districts, which make up about one-third of the City of Stamford and do not have access to a public water supply.
