## GPSLogger for Android

1. Download **GPSLogger** for Android from Google Play

2. In Upper Left Corner click on **Default Profile**

3. Select **Default Profile** and then **Add Profile**. You can then name the profile for the road(s) that you are intending to perform travel time runs on and set it as your Profile by selecting it.

4. Select **Logging Details**. Select **Log to KML** and **Log to Plain Text**. Scroll down to **New file creation** and select **Every time I start**.

5. Go back to the profile page and select **Performance**. Make sure that **Keep GPS on between fixes** is selected and that **Retry time interval for accuracy filter** is set to 10 seconds.

6. When you are ready to begin tracking your location select **Start Logging**. When you are done select **Stop Logging**. Citizen travel time participants should complete routes from start to finish as shown on the "Stamford Signal Opt. Data Collection" map. There are 22 travel time routes highlighted on this map.

You can then email the KML File and CSV files using the share symbol ( ) in the lower right corner. Select the email program of your choice. The email program you select should open up with the *.txt and *.kml travel time files as attachments. Send this email to**SignalSynchProject@StamfordCT.gov**.
